Breather & Vent General Installation Instructions:

General installation instructions for BUR:

1. Select a location over an insulation joint
2. Cut a 4" hole through felts & insulation (Make sure that the vapor barrier is not punctured)
3. Center the vent over the opening, making sure that the opening is free of debris and set in asphalt cement
4. Flash base flange with 2 ply's of felt and asphalt cement (Extend first ply 6" beyond flange and second 9")
5. Pour flood coat of asphalt to base of roof vent
6. For other roofing systems follow manufactures' specifications
