Marathon Roofing Products
ALUMINATOR

- Innovative & Improved Dome & Ring Castings
- Available in PVC & TPO Coatings
- Improved Packaging - Bulk or Individually Packed Options

ALUMINUM FAST FLOW

- Available in 2", 3", 4", 5", 6", 8" and Non-Standard Sizes
- New Clamping Ring Style for Single-Ply Systems
- Constructed of Heavy Gauge (.081) Spun Aluminum
- All Common Sizes Available for New & Retrofit Styles
- Quick & Easy to Install & Maintain
- Bolt-in-Place PVC Strainer Dome Standard, Cast Iron or Aluminum Strainers Optional
- Efficient & Economical
- Optional Anti-Backup Seals Available

FEATURES

- Standard with ProSeal Rubber Seal
- Larger Stud Diameter for Increased Strength of Hardware
- Available in Sizes of 3", 4", 5" & 6"
- Includes Strong Mechanical Seal that Prevents Water Back-up Issues
- Flange Diameter 16"
- Drain Outlet Length 12"

WARNING
Cancer and Reproductive Harm

PVC Coating Only

Intimidator 8" Aluminum Retrofit Drain with Clamping Ring - Available with Optional Back-up Seal & Aluminum Ring & Dome.
**COPPER-TITE**

- A Retro-Fit Insert Copper Drain
- Seals Securely within Existing Pipe
- Prevents Water Back-up Problems by Sealing Side Wall Gaps with Expandable Water Proof Tape
- Simple & Quick to Install, Just Peel Off Tape
- COPPER for Reliable Long Life
- TITE for Secure Waterproof Fit
- Fits Drains 2" (51mm) to 10" (203mm)
- Available in Premium 18" Flange Diameter with Clamping Ring
- Available in Premium 14" Flange Diameter with Clamping Ring.

COPPER-TITE sealant tape is designed to expand to approximately four times its compressed thickness. Just prior to inserting the COPPER-TITE drain the installer removes the exterior restraining tape and immediately sets the retro drain in place. The released tape gradually expands to fill the space between the COPPER-TITE drain and the existing drain sleeve making the connection watertight.

**PROLINER STRAIGHT DRAIN WITH CLAMPING RING**

Use applications where direct mechanical pressure is required by a clamping ring to provide additional bonding of membrane to drain and roof deck. Ring is made of Heavy Duty rigid material and secured in place by six bolts and nuts equally tightened to provide consistent pressure to secure the membrane.

*Note:* Clamping ring option is recommended for single ply systems.

**PROLINER STRAIGHT DRAIN**

Most common style. Use when bowl is too small for funnel profile or when there is only a leader pipe. Suitable for most applications. Wide drain flange offers extra bonding area for routine installations. Variable length outlets are available to suit unusual job site circumstances.

*Note:* Only the Proliner Drain System offers outlets to fit non-standard diameters.

**COPPER-TITE**

COPPER-TITE features a 2" (51mm) wide band of high density expanding foam tape impregnated with asphalt which is factory applied in a compressed state around the drain outlet.

COPPER-TITE sealant tape expands more slowly in cold temperatures. When heat is applied to the inside of the outlet the sealant tape expands more rapidly. Should the tape expand too much before inserting the COPPER-TITE drain, simply recompress the tape by hand and then insert the drain.

**PROLINER STRAIGHT DRAIN WITH CLAMPING RING**

**PROLINER STRAIGHT DRAIN**

**CLAMPING RING**
made of rigid material to provide consistent pressure; is recommended for single ply systems.

**STRAINER 10"**
diameter, 3 bolt attachment; high density polyethylene standard; cast iron alloy optional.

**OUTLET**
of malleable metal alloy fits inside cast iron, steel, PVC or copper existing drain pipe.

Outlet is designed to be expanded by the PROLINER EXPANDER TOOL to create mechanical, metal-to-metal seals, locking the Proliner into place with permanent waterfront seals.
ProSeal

- Available in 3", 4", 5", and 6"
- Heavy Duty, Durable, Long Lasting Copper
- Also Available in Spun Aluminum
- Strong Mechanical Seal Prevents Water Backups
- Large 3 Bolt Strainer Dome
- All Common Sizes Available
- Bolt Down Clamping Ring for Single-Ply Systems
- Variable Length Copper Outlets, Up to 15"

Economy Aluminum Drain

- Available in Sizes 2", 3", 4", 5" & 6"
- Constructed of Heavy Duty (.081) Spun Aluminum
- 12" Long Outlet & 16" Diameter Flange
- Bolt-in-Place 5" Aluminum Strainer

Dura Roof Drains

- Available in 2", 3", 4", 5" and 6
- Dura Retrofit Drains
- Dura Scupper Drains
- Accessories
- Compatible with Bur, Modified, and Epdm

DURA RETROFIT ANTI-BACKUP ROOF DRAINS
Made of thermoplastic rubber, highly resistant to ultraviolet sunrays, and other atmospheric and chemical conditions.
Order basket strainer separately.

Options/Accessories

Overflow
Marathon Roofing Product’s Overflow option is a spun aluminum attachment that is designed to use with all of our aluminum drains with clamping ring. It provides additional drainage when water levels exceed 2 inches (also available in 4 inches).

2.75” Low Profile Aluminum Strainer

PVC/TPO Coatings
Our Aluminator Flange has the option to be PVC or TPO Coated for direct hot air welding of PVC and TPO type roofing membranes.
