

ROOFNEK

Features

- Constructed of Heavy Gauge Spun Aluminum
- Water Tight Conduit System
- Easily Flashing with Roof Membrane System
- Aluminum Base Standpipe
- Solvent Welded PVC Hooded Outlet
- 3 Cable Openings Plus 3 Additional Knockouts

Options/Accessories

- TPO Coated Flange
- PVC Coated Flange

Roofnek virtually eliminates the need for penetration pockets when flashing/waterproofing flexible roof penetrations. The simple, two-piece construction eliminates time consuming and costly field flashing of electrical cables and wires, and refrigerant conduits. Aluminum base standpipe with a solvent welded PVC hooded outlet to handle three cable openings plus three additional knockouts.

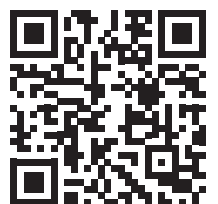

PVC Coating
Only
